What is eProtocol™?
- eProtocol™ is web-based software that promotes and facilitates protection of human research participants.
- eProtocol™ helps assure compliance with federal regulations for human research protections.
- eProtocol™ is used by researchers, management staff, technical teams, committee members, and reporting units.

What are some of the benefits of eProtocol™?
- Intuitive, online interface with dynamic, question-based forms ("smart forms")
- Streamlined administrative processes (including the elimination of duplicative data entry for common compliance processes)
- Ability to modify and edit drafts, pause form completion and continue later
- Forms that can be completed by someone other than the form signatory
- Reporting and email notification features

When will eProtocol™ be available to PIs?
- Beginning April 15, 2016.

Will all my protocols be available in the new system?
- At system launch (April 15, 2016), only new applications will be processed using eProtocol™. Active protocols initiated prior to the launch will continue to be processed using the existing submission mechanisms.
- Existing and pending protocols will be migrated into eProtocol™ approximately three months after system launch. Study numbers will remain the same. Some protocol data can be migrated from the existing electronic systems. Committee staff, not PIs, will move data that cannot be migrated manually.

How do I access eProtocol™?
1. Pick an internet browser (e.g., Safari, Firefox, Internet Explorer)
2. Adjust that browser’s settings to allow popups
3. Go to the URL https://uhmanoa.keyusa.net/
4. Use your UH email username/password to log on

How can I learn more about using eProtocol™?
- View the educational videos at https://www.hawaii.edu/researchcompliance/eprotocol-learning-videos

Who do I contact if I need help?
- For help navigating the IACUC eProtocol™ application and submission process, contact the UH ORC Human Studies Program
